Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The exact structure of the claimed invention is not clearly defined. For example, in claim 21, only a portion of a sidewall of the first trench isolation region need be void of a nitride liner, implying that the remaining portion may have a nitride liner. Similarly, a portion of the second sidewall of a second trench isolation region may have a nitride liner.

Consequently, it appears that both trench isolation regions may have a partial nitride liner on some undefined part of the respective sidewalls. As such, it is not clear how these two different trench isolation regions are actually distinguished from each other, and structurally different.

Similarly, with respect to claim 32, it appears that both sidewalls may have partial nitride liners, or the first sidewall may have none at all, and the second sidewall may have a partial nitride liner, or the first sidewall may have no nitride liner and the second sidewall may be completely covered with a nitride layer.

As such, the exact structure of the overall invention is not clearly understood.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-40 are rejected, insofar as understood, under 35 U.S.C. 103(a) as being unpatentable over Mandelman in view of Divakaruni, Puchner, Rengarajan and Mukai, all of record, for the reasons

stated in the previous actions, hereby incorporated by reference. To the extent the claims are definite, it appears that these references, taken together, show all of the claimed features of the invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Wojciechowicz whose telephone number is 571-272-1739. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ken Parker can be reached on (571) 272-2298. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
